

# Narrowboat ADAGIO

An ideal long term cruising or residential craft of "go anywhere" dimensions, *Adagio* is a semi traditional narrowboat launched in 2005. The steelwork and fit out is by Heron Boatbuilders, who built a good number of these joshier style boats at their Mirfield yard in Yorkshire until they ceased in 2006.

The boat is also a **reverse lay out** style. Starting at the stern, which is the main point of entry, steps lead down from the semi trad cockpit area to the galley, which is equipped with gas cooking, a fridge and a microwave. Cupboards lining the entrance steps provide a roomy hanging locker and utility store of the port side, whilst on the starboard side the electrics are housed, including a 3kW Victron inverter. The galley is open plan and the dinette is adjacent. This also converts into a guest double berth if required. The saloon follows and has an L shaped settee built in, with a multi fuel stove installed. There is also gas-fired central heating throughout. Next is a walk through bathroom area which has a three quarter size bath with shower over, a pump out macerator wc and a hand basin with a vanity unit above. Finally there is a permanent double berth if the forward cabin, with glazed hardwood doors that lead out into the bow well deck.

The boat's propulsion is provided by an Isuzu 42hp diesel engine - a popular choice in the canal boating fraternity.
